"POTENTIAL" Public Safety Power Shutoff (PSPS) Events for Southern California Edison (SCE) and San Diego Gas & Electric (SDG&E)

The California State Warning Center (CSWC) received notifications from Southern California Edison (SCE) and San Diego Gas & Electric advising they have notified customers of a *potential* Public Safety Power Shutoff (PSPS) due to an offshore wind event and critical fire weather conditions. CSWC has made notifications to State and Law Enforcement Agencies.

- The Cal OES State Operations Center is monitoring.

• SCE

- SCE continues to monitor existing weather conditions as well as the Woolsey and Hill fires actively burning in the service territory. The SCE Emergency Operations Center will remain activated until this evening with activation continuing on 11/11/18.
 - No circuits are proactively de-energized at this time.
 - 45 circuits have been identified for monitoring today, 11/12/18 (with an additional 6 which would have downstream impacts) for potential de-energization. This list includes circuits in Riverside County, which has not previously been listed for potential impacts.
 - 45 circuits have been identified for monitoring on Tuesday, 11/13/18 (with an additional 5 circuits which would have downstream impacts) for potential de-energization.
 - Los Angeles, Orange, San Bernardino, Ventura, and Riverside counties have all been notified of identified PSPS circuits and are continuing to receive all associated maps and shapefiles as updates are made.
 - Customer notifications of possible PSPS de-energization are ongoing
 - Customers can find the most updated outage information on <https://www.sce.com/wps/portal/home/outage-center> or by contacting the SCE Customer Service Center at 1-800-655-4555.

WEATHER OF CONCERN

Northern California

- Dry weather continues with cool nights and near to above normal days through the week.
- Critical fire weather conditions expected to end this morning as winds diminish.
- Widespread smoke from the Camp Fire will continue to impact the area.

Southern California

- Strong Santa Anas will continue through Tuesday.
 - Winds will subside a tad on Wednesday, but still will be strong enough in areas to warrant an extension in time of the Red Flag Warning through 1700 hours Wednesday.
 - The combination of strong winds, low humidity, and very dry fuels could lead to explosive fire growth from any fire starts.
 - Very low humidity will continue Thursday-Friday, but with much weaker winds.

Active Weather Warnings, Watches and Advisories by County:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

Key Points

11/12/18 - 11/18/18

Monday - Wednesday

- A strong Santa Ana wind event will continue across much of the Southern Region. Combined with the very dry conditions, this will lead to very critical fire weather across the area. Winds on Wednesday will be weaker than the Monday-Tuesday peak, but critical conditions will persist.
- Winds in the Coastal and Inland Regions will continue to decrease through Monday, but elevated fire weather conditions will persist through the week with very dry relative humidity.

Thursday - Sunday

- The Santa Ana winds should largely subside by Thursday, but elevated fire weather conditions will persist through the rest of the week. No precipitation is currently expected through Sunday.

All Days

- Widespread poor air quality due to smoke likely to continue.

Inland and Coastal Regions Summary

- Winds have generally decreased this morning, though local areas of breezy winds will linger.
- Except for isolated pockets, winds today will generally drop below critical levels and remain that way through the week.
- However, conditions will remain very dry with above normal temperatures, so elevated fire weather conditions will persist through the week.
- Widespread poor air quality due to smoke will likely continue through the week.

Southern Region Summary

- Strong Santa Ana winds will peak today and Tuesday.
- **Wind speeds**
 - Sustained winds 20-35 mph with gusts 45-55 mph are generally expected
 - Higher gusts up to 60-70 mph possible in the mountains and other prone locations
- **Relative Humidity**
 - Extremely dry: 2-10 percent, with poor overnight recoveries
- Critical fire weather conditions will persist into Wednesday, though sustained speeds and gusts will likely be about 10 mph weaker than the numbers listed above.
- After winds decrease late Wednesday, elevated fire weather conditions will linger through the week.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

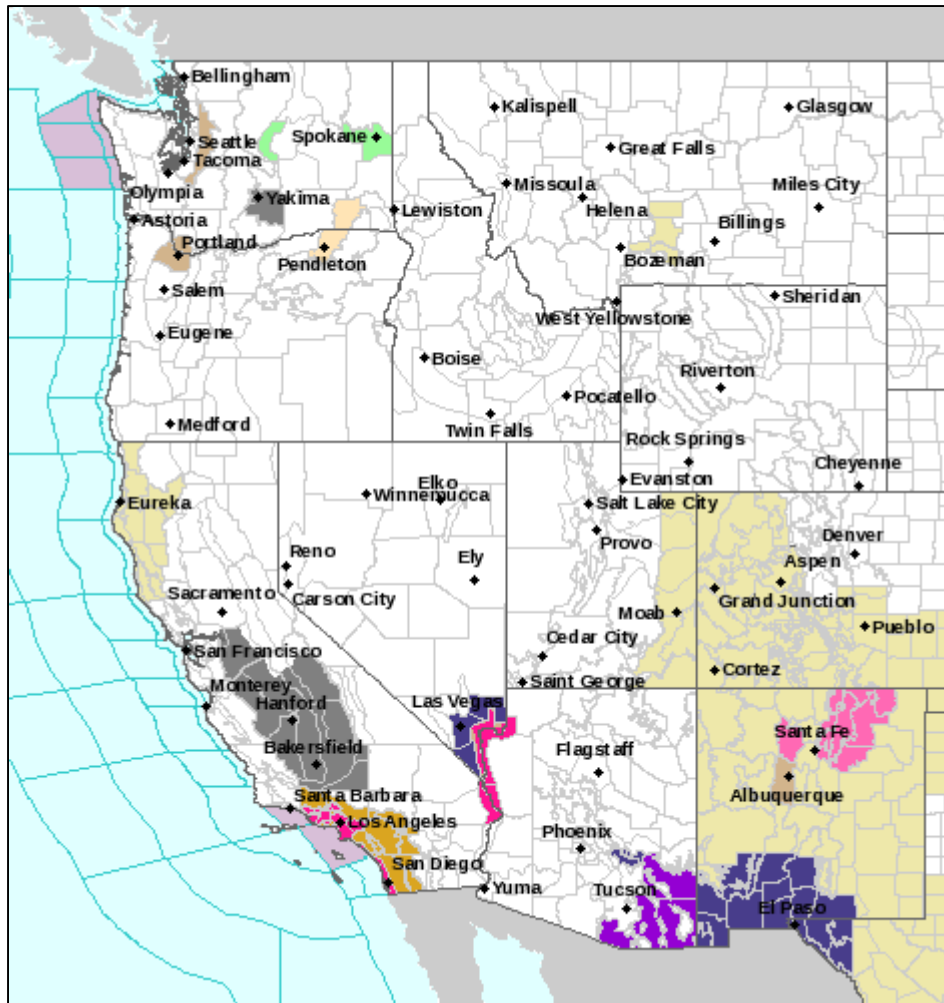

- While there will be much lighter winds the rest of the week, conditions will remain unseasonably mild and dry.
- High pressure will continue to produce warm, dry conditions into the weekend.
- Significant N-NE/Offshore winds will end today with widespread light winds across the region the rest of the week Tuesday onward.
- No precipitation expected through Saturday at a minimum. Some may occur around Thanksgiving, but confidence in that event is low given how long that is from today.
- Afternoon Relative Humidity (RH) will be low (5-15%) most afternoons this week with poor overnight recovery (5-25%) in many areas, particularly mid and upper slopes. Some valley locations that have been very dry may see RH will increase in a few days to afternoon mins of 12-18% and overnight recoveries of 25-35%.
- Afternoon high temperatures will continue 5-10 degrees above seasonal normals with warmest inland areas mostly in the mid 70s. Overnight lows will be pretty close to seasonal values, and frost/freezing conditions are likely to become a bit more widespread.

SOUTHERN CALIFORNIA

- A ridge of high pressure will build into California from the Pacific Ocean today and be directly overhead Tuesday. This ridge will then weaken slowly Wednesday through this weekend.
- Northeast winds of 20 to 40 mph with gusts to 60 mph will surface across much of Southern California through Tuesday morning. These northeast winds across Southern California will weaken to 15 to 25 mph with gusts to 40 mph Tuesday afternoon through Wednesday afternoon. Only local gusty offshore winds are expected across Southern California Wednesday evening through Thursday morning. Winds will be light across the region Thursday afternoon through this weekend.
- Widespread single digit minimum humidity along with very poor nighttime humidity recovery will continue through Friday. Minimum humidity will increase into the teens with better humidity recovery at night this weekend.
- Temperatures will be near to a little below normal across the mountains through this weekend, with upper 40s and 50s. Temperatures will be near to a little above normal in the valleys through this weekend, with 70s to low 80s.
